

## Overview of Public Works CIP

The Public Works Proposed FY 06–FY 11 CIP includes two separate sections: Roads and Bridges. In most years only the Board of Education CIP exceeds the Public Works CIP in the amount of funding.

Noteworthy are a number of road construction projects. These roads, including Georgetown Boulevard and Monroe Avenue, will reduce traffic on congested State routes and intersections by providing local traffic alternatives.

Funding is included in the Proposed CIP for the construction of alternative roads in and around Westminster to reduce traffic on State Route 140 and to reduce the pressure on busy intersections in this corridor. A feasibility study was completed and provides a plan of alternatives for traffic heading north and south of Westminster. Final decisions on implementation are being made.

The Proposed CIP includes funding for the paving of four gravel roads to address on-going maintenance issues. The Proposed CIP also includes on-going bridge maintenance and replacement.

For additional information on these or other Public Works projects please refer to the individual project pages.
