# Bramble Hills Well System Rehabilitation

Water

6400

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding for the rehabilitation of the Bramble Hills water system. The County was court-ordered to take ownership of the system, and it was found to be in very poor condition. To meet current standards, a new building will be required so the existing well is not housed in the same building as the chemicals for treating the water. Also included in the new building will be the motor control center, sampling station, and alarm system. The existing electric service does not meet current code. Along with a new electric service, the County will install phone lines so the system can be monitored from the Freedom Water Treatment Plant. A generator will be included to keep the pump operating when power is lost for extended periods of time. The distribution system will be replaced with a four inch water main with new services to each of the twelve houses. A backup well may be required by MDE in the future.

Projected operating impacts include: maintenance, utility costs.

# Carroll Highlands Pumping Station Renovation

Freedom Sewer

6407

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding for the renovation and modernization of the Carroll Highlands Pumping Station. Some of the renovations would consist of replacing existing pumps and motors, piping and valves, electrical systems and controls, replacement of existing HVAC, roof, ladders and landings in the wet well, and site fencing and gates.

Projected operating impacts include: reduced maintenance costs.

# Freedom District Hydrant Replacement

Freedom Water

6359

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides on-going funding to replace the County's 600 hydrants. Some of these hydrants have surpassed the estimated useful life of thirty years. The annual allocation for this project funds approximately twenty-five hydrants. The following list identifies the sites planned for FY 08.

- |                              |                                    |
|------------------------------|------------------------------------|
| 1 hydrant - Hemlock Dr.      | 1 hydrant - Melville Rd.           |
| 1 hydrant - Bonnie Brae Rd.  | 1 hydrant - Lake View Ave.         |
| 2 hydrants - Heather Heights | 1 hydrant - Oakland Mills Rd.      |
| 1 hydrant - Nickoles Dr.     | 2 hydrants - Carroll Dale Rd.      |
| 1 hydrant - Old Liberty Rd.  | 1 hydrant - Oak View Dr.           |
| 2 hydrants - Sykesville Rd.  | 3 hydrants - Westchester Hills Ct. |
| 1 hydrant - Bevard Rd.       | 1 hydrant - Sunset Dr.             |
| 3 hydrants - Circle Dr.      |                                    |
| 1 hydrant - Grand View Ave.  |                                    |
| 1 hydrant - Waite Ave.       |                                    |
| 1 hydrant - Carroll Rd.      |                                    |

# Freedom District Hydraulic Looping-Brangles

Freedom Water

Proj #

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding to connect water mains along Brangles Road in the Freedom area to provide adequate looping in the Freedom water system. Looping mains is to connect dead ends in two water lines. By connecting these lines water flows more evenly throughout the system and maintains a constant water pressure.

Projected operating impacts include: maintenance costs.

# Freedom District Looping-Monroe (Oklahoma to Bennett)

Freedom Water

6409

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding to connect water mains along Monroe Avenue (Oklahoma to Bennett) in the Freedom area to provide adequate looping in the Freedom water system. Looping mains is to connect dead ends in two water lines. By connecting these lines water flows more evenly throughout the system and maintains a constant water pressure. New development will partially cover the cost of this project.

Projected operating impacts include: maintenance costs.

# Freedom District-Relief Sewer No. 2

Freedom Sewer

6374

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides planned funding to add a relief sewer by increasing the existing ten inch main to a fifteen inch main for 5,447 feet from Johnsville Road at Bartholow Road, south through Parrish Park at Piney Ridge Parkway. Enlarging the main would allow for increased flows resulting from future development and/or major storm events.

Projected operating impacts include: maintenance costs.

# Freedom Wastewater Treatment Plant Expansion

Freedom Sewer

6386

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides planned funding to upgrade the Freedom Wastewater Treatment Plant. The plant is currently designed to treat an average daily flow of 3.5 MGD and will need to be increased to meet the Department of Planning's projection of average wastewater flows in the Freedom District of 4.2 MGD. The Maryland Environmental Service (MES) operates and manages this facility for the County. MES is currently designing upgrades to the plant that will address the MD Department of the Environment requirements for enhanced nutrient removal. The current daily flows average 2.1 MGD.

# Freedom Water Treatment Plant Upgrade and Expansion

Freedom Water

6347

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides additional funding to design and construct a 4.0 million gallon per day plant adjacent to the current Freedom Water Treatment Plant (FWTP). The City of Baltimore owns Liberty Reservoir from which the plant draws its water. The new treatment plant includes: a utilities control center, new raw water intake line, membrane filtration system, improved disinfection methods, a new clarifier for water processing, clear well storage, and the addition of a twenty inch parallel water main on Oklahoma Road and Mineral Hill Road to handle the expanded flow and distribution of the additional water capacity.

# Freedom Water Treatment Plant Water Transmission Main

Freedom Water

6410

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding for Phase II for the Freedom Water Treatment Plant. The existing sixteen inch main will be replaced with a twenty inch main. The new main will handle increased flows from the expansion of the plant from three million gallons per day to seven million gallons per day.

# Freedom/Hampstead - Water Meters

Larry Brown, Senior Budget Analyst (410) 386-2082

6311

This on-going project provides funding for the enhancement and replacement of approximately 9,000 existing meters on an average sixteen year life cycle. The enhancements will include software and hardware equipment that will enable staff to collect meter readings while driving by homes. The following priority list addresses the oldest meters first.

- 1st group is Route #55, with 340 meters (Hilltop, Melstone Valley, Flanders, Carpenters Mount subdivisions)
- 2nd group is Route #15, with 302 meters (Clipper Hill, Brimfield subdivisions)
- 3rd group is Route #20, with 170 meters (Oakland Mills Area)
- 4th group is Route #21, with 128 meters (Oakland Road Area)
- 5th group is Route #22, with 160 meters (Mineral Hill Road Area)

# Gaither Road 8" Sewer Line

Freedom Sewer

6369

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides planned funding for approximately 2.25 miles of eight inch sewer line along Obrecht Road and down Gaither Road to the County line, to the existing pumping station. Approximately 275 parcels will be connected to this sewer line along Obrecht and Gaither Roads, and connecting side streets, including Gaither Manor Apartments.

Projected operating impacts include: maintenance costs.

# Gaither Road 8" Water Main

Freedom Water

6365

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides planned funding for approximately 2.6 miles of eight inch water line to serve existing and planned development along Gaither Road and all side streets. This line would extend from Obrecht Road to the ends of Gaither Road and Patapsco Drive. Approximately 275 parcels will be connected to this water line, including Gaither Manor Apartments.

Projected operating impacts include: maintenance costs.

# Hampstead Grit Removal System

Hampstead WWTP

Proj #

Larry Brown, Senior Budget Analyst (410) 386-2082

The grit removal system will replace the failed system that was built in 1984. This system will keep grit out of the process stream with fewer solids at the end process, leading to less wear and tear on the process equipment in the plant.

Projected operating impacts include: reduced maintenance costs.

# Hampstead Office Renovations

Hampstead WWTP

6411

Larry Brown, Senior Budget Analyst (410) 386-2082

This project includes renovations to the existing control building. Currently, the building is being utilized for a dual purpose, for administrative office space and the location of the process blowers. The building lacks modern conveniences, such as hot water for shower and kitchen facilities, proper heating and air conditioning. The close proximity of the process blowers to the offices creates an unsuitable environment for staff due to noise and heat from the blowers.

The blowers will be relocated as part of the upgrades to the Poly Aluminum Chloride Facility. Once the blowers are moved, the existing space will be renovated by installing a HVAC system and hot water system, creating appropriate administrative space and kitchen/conference area, and upgrading the restroom. The plant alarm system will be upgraded, as well as the roofing system.

Projected operating impacts include: reduced maintenance and utility costs.

# Hampstead Sludge Dewatering Facility Replacement

Hampstead WWTP

6404

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding for Phase II replacement of the Sludge Dewatering Facility at Hampstead WWTP. Phase I, the design and replacement of the existing press, is funded and underway. Phase II consists of creating an additional sludge storage area and complete re-evaluation of the existing facility.

Projected operating impacts include: reduced maintenance costs.

# Hampstead Ultraviolet Disinfections System Renovation

Hampstead WWTP

6412

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding to provide new equipment and new variable power dual bank UV system technology at the HWWTP. The existing system built in 1992 is still operational but nearing the end of its life cycle. The system is designed and operated in compliance with the Draft Maryland Department of the Environment (MDE) Discharge Permit for disinfections requirements.

Projected operating impacts include: reduced maintenance costs.

# Hampstead Waste Activated Sludge Tank Renovation

Hampstead WWTP

6413

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides planned funding to renovate tank components for sludge storage and thickening units last upgraded in 1984. The existing concrete tank structures are suitable for continued service but the majority of the tank sludge piping and valves require replacement.

Projected operating impacts include: reduced maintenance costs.

	FY 08	FY 09	FY 10	FY 11	FY 12	FY 13	Prior Allocation	Balance to Complete	Total Project Cost

# Meter Vault Replacement

Freedom Water

6414

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding for the replacment of approximately 900 water meter vaults in the Freedom area that were installed in the late 1970s. The new vaults are made of PVC and will replace the old vaults made of bituminous coated cardboard, which are deteriorating.

Replacement areas:

- Piney Ridge Village Sections 1 and 2
- Oklahoma Estates
- Hilltop Estates
- Clipper Hill Estates
- Carrolltowne Estates
- Westchester Estates
- Carroll Dale
- Lexington Run Estates
- Berkley Estates
- Hodges Road, Norris Ave.

# Pine Hill Wastewater Pumping Station Renovation

Freedom Sewer

6370

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding to renovate the Pine Hill Pumping Station. The existing station is being evaluated for needed upgrades. The pumping station will be reconfigured from an underground to an above ground facility. The existing structure will be replaced as well as the generator, and the outdated controls will be upgraded. Engineering design of the renovations is underway.

Projected operating impacts include: reduced maintenance costs.

# Replace Force & Gravity Sewer Mains at North Station

## Hampstead Sewer

6398

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding for a replacement force main (built in 1970) and construction of a new gravity main to meet existing demand and allow for future development near the North Station facility located near the intersection of Maryland Routes 30 and 482. This project replaces the existing six inch force main installed in 1969 with a new eight inch force main. The new gravity main will be designed to meet the existing main near Panther Drive.

Projected operating impacts include: reduced maintenance costs.

# Sanitary Sewer Manhole Rehabilitation

Freedom/Hampstead Sewer

6403

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding to rehabilitate Freedom Area's 3,000 sanitary sewer manholes and Hampstead's 1,000 sanitary sewer manholes. Through the comprehensive sewer study program and the maintenance program approximately ten per cent of the systems' manholes were inspected in the past year. Some were found to be in need of some repair. The annual funding for this project will allow approximately twenty-five manholes to get foam injection rehabilitation, and approximately fifteen manholes to get structure rehabilitation.

Projected operating impacts include: reduced maintenance costs.

# Shiloh Wastewater Pumping Station Renovation

Hampstead Sewer

6389

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides funding for the upgrade of Shiloh WWPS. It was originally funded in FY 04 for adding an additional pump. Since then, additional problems have surfaced that require increasing the scope of work and funding for the project. The pumping station was designed in 1974 and placed on-line in 1979. Some of the items in need of upgrading/replacing at the existing station are: installing a third pump, upgrading existing pumps and valving, updating pump and electrical controls, adding variable frequency drives, emergency bypass pumping on force main, new hot water heater, adding/replacing the wet well auger for debris removal, level sensing controls, air diffuser, lighting, ventilation, railing and grating, upgrading/replacing heat and ventilation systems, waterproofing of foundation walls, replacing existing fencing and gate, installing a pump removal system, replacing well pump system, and evaluating the existing force main. A portion of the main will be relocated during the construction of MD Rte. 30 Hampstead Bypass project.

Projected operating impacts include: reduced maintenance costs.

# Snowden's Run Wastewater Pumping Station Rehabilitation

Freedom Sewer

6415

Larry Brown, Senior Budget Analyst (410) 386-2082

This project provides planned funding to replace the existing underground pumps currently housed in a metal structure that is badly deteriorated. The new building will be constructed over the existing wet well, and will house the new pumps, as well as associated piping, electrical wiring, and controls. The pumping station is located off Snowden's Run Road, next to Liberty Reservoir.

Projected operating impacts include: reduced maintenance costs.
