

Overview of Public Works CIP

The Public Works FY 09–14 Proposed CIP includes two separate sections: Roads and Bridges. In recent years only the Board of Education and Conservation CIP exceeded the Public Works CIP in the amount of funding.

Funding is included for a number of road construction projects. These roads should reduce traffic on congested State routes and intersections by providing local traffic alternatives. Projects included in the CIP are Market Street Extended and the construction of other alternative roads in and around Westminster to reduce traffic on State Route 140 and to reduce the pressure on busy intersections in this corridor. A feasibility study was completed and provides a plan of alternatives for traffic heading north and south of Westminster.

Approximately \$7.7 million is in the FY 09 Proposed CIP for Overlays, Low Volume Road Improvements and Neighborhood Overlays to maintain roads throughout the County. The recommendation also includes on-going bridge maintenance and replacement.

For additional information on these or other Public Works projects please refer to the individual project pages.
