

**PART V: RECOMMENDATIONS**

The Board of County Commissioners adopted a package of amendments to Chapter 71 under Ordinance 2010-04 on April 1, 2010. The changes in the ordinance were the result of recommendations in the FY 09 concurrency report. This year’s report does not recommend changes to Chapter 71. Completion of the Land Development and Permits Database System and CIP projects to address inadequate bridges are recommended, as described below.

- 1. Complete the Land Development and Permits Database System. The system will link building permits with approved development plans.
  
- 2. Consider CIP projects for bridges CL 393, CL 344, and CL 299. These bridges are inadequate to support certain fire and emergency response apparatus.

*CHANGES TO ADMINISTRATIVE PROCEDURES*

*RECOMMENDED CIP PROJECTS*
