Freedom District Water Plant Valve Repair Completed

Sykesville, MD, February 25, 2016 – Today, Thursday February 25th the Carroll County Bureau of Utilities replaced a water main valve on one of the main pumps to the Freedom Water Treatment Plant.

The repair took place between 8:00 am and 11:00 am with minor disruption of service being encountered in isolated areas of the service area. Water lines are being flushed, now that the repair was completed, to clear any sediment that may have been in the lines.

Customers may temporarily experience some cloudy water. Turning the cold water tap on at the highest elevation of the structure/home and running water for several minutes will clear the lines. It is advisable to refrain from using high water volume appliances such as washing machines, dishwashers, etc., during periods of cloudy water or low pressure.
