

# CC Maintenance Center

## Location

The Carroll County Maintenance Center project is located off of Old Meadow Branch Road in Westminster. It is within the Double Pipe Creek watershed.

## Description

This project will retrofit the existing facility and implement an innovative iron-enhanced sand filter which is expected to achieve greater than 80-90% nutrient removal. A church youth group will plant trees along the receiving stream at the project site and in the process learn about localized water quality issues.

## Project Engineer

CLSI, Inc.

## Contractors

White Pine Construction Corp. and Conewago Enterprises

## Project Budget

Engineering: \$37,517

## Project Timeline

Phase one of construction is complete. Phase two will be complete in November of 2017.

## Updates

Phase two of construction with the storm drain will begin at the end of October.
